CONTENTS

Special Issue: 10 Years of the Gibbs Conference on Biothermodynamics, E. Di Cera (Editor)

Foreword 1

The Gibbs conference on biothermodynamics: Origins and evolution
G.K. Ackers (St. Louis, MO, USA) and D.W. Bolen (Galveston, TX, USA) 3

Thermodynamics, molecules and the Gibbs conference
J.A. Schellman (Eugene, OR, USA) 7

Possible origin of differences between van't Hoff and calorimetric enthalpy estimates
J.B. Chaires (Jackson, MS, USA) 15

The thermodynamic mechanism of protein stabilization by trehalose
G. Xie and S.N. Timasheff (Waltham, MA, USA) 25

Local fluctuations and global unfolding of partially folded BPTI detected by NMR
E. Barbar, V.J. LiCata (St. Paul, MN, USA), G. Barany (Minneapolis, MN, USA) and C. Woodward (St. Paul, MN, USA) 45

Calorimetrically-derived parameters for protein interactions with urea and guanidine–HCl are not consistent with denaturant *m* values
G.T. DeKoster and A.D. Robertson (Iowa City, IA, USA) 59

Structure-based statistical thermodynamic analysis of T4 lysozyme mutants: structural mapping of cooperative interactions
V.J. Hilser, B.D. Townsend and E. Freire (Baltimore, MD, USA) 69

Time-resolved fluorescence of hemoglobin species
Z. Gryczynski, S. Beretta, J. Lubkowski, A. Razynska, I. Gryczynski and E. Bucci (Baltimore, MD, USA) 81

Heat capacities of protein functional groups
G.I. Makhatadze (Lubbock, TX, Baltimore, MD, USA), M.M. Lopez and P.L. Privalov (Baltimore, MD, USA) 93

Critical role of W60d in thrombin allosterism
E.R. Guinto and E. Di Cera (St. Louis, MO, USA) 103

Thermal unfolding of the N-terminal RNA binding domain of the human U1A protein studied by differential scanning calorimetry
J. Lu and K.B. Hall (St. Louis, MO, USA) 111

Significant discrepancies between van't Hoff and calorimetric enthalpies. III
Y. Liu and J.M. Sturtevant (New Haven, CT, USA) 121

Kinetic analysis of a protein antigen–antibody interaction limited by mass transport on an optical biosensor
D.G. Myszka, T.A. Morton, M.L. Doyle and I.M. Chaiken (King of Prussia, PA, USA) 127

Competitive electrostatic binding of charged ligands to polyelectrolytes: practical approach using the non-linear Poisson–Boltzmann equation
I. Rouzina and V.A. Bloomfield (St. Paul, MN, USA) 139

Tertiary and quaternary chloride effects of the partially ligated (CN-met) hemoglobin intermediates
Y. Huang, M.L. Koestner and G.K. Ackers (St. Louis, MO, USA) 157

Thermodynamics of protein unfolding: questions pertinent to testing the validity of the two-state model
M.R. Eftink and R. Ionescu (University, MS, USA) 175

Regulation of rabbit muscle phosphofructokinase by phosphorylation
G.-Z. Cai, T.P. Callaci (St. Louis, MO, USA), M.A. Luther (NC, USA) and J. Ching Lee (Galveston, TX, USA) 199

Experimental measurement of the effective dielectric in the hydrophobic core of a protein
B. García-Moreno E., J.J. Dwyer, A.G. Gittis, E.E. Lattman (Baltimore, MD, USA), D.S. Spencer and W.E. Stites (Fayetteville, AR, USA) 211

Is substrate inhibition a consequence of allostery in aspartate transcarbamylase?
V.J. LiCata and N.M. Allewell (St. Paul, MN, USA) 225

A mutation in *E. coli* SSB protein (W54S) alters intra-tetramer negative cooperativity and inter-tetramer positive cooperativity for single-stranded DNA binding
M.E. Ferrari, J. Fang and T.M. Lohman (St. Louis, MO, USA) 235

Quantitative analysis of ligand–macromolecule interactions using differential dynamic quenching of the ligand fluorescence to monitor the binding
M.J. Jezewska and W. Bujalowski (Galveston, TX, USA) 253

Effects of NaCl on the linkages between O_2 binding and subunit assembly in human hemoglobin: titration of the quaternary enhancement effect
M.L. Doyle (King of Prussia, PA, USA), J.M. Holt and G.K. Ackers (St. Louis, MO, USA) 271
